

Subject: [radiojove-data] 26 Feb 2014 non-Io-C

From: Dave Typinski <davetyp@typnet.net>

Date: 02/27/2014 20:00

To: RadioJove-Data <radiojove-data@lists.nasa.gov>

Adding to Tom's nice report, here's some non-Io-C from Wednesday morning.

RCP L-bursting observed from 16 to 25 MHz. No modulation lanes evident. Well defined arc structure.

Jupiter was 3° to 14° off axis.

Jupiter was trailing the Sun by 123°.
