

Subject: [radiojove-data] 11 Oct 2014 non-Io-A

From: Dave Typinski <davetyp@typnet.net>

Date: 10/11/2014 21:42

To: RadioJove-Data <radiojove-data@lists.nasa.gov>

Adding to Tom's report, here's a rather long, strong non-Io-A storm from Saturday morning.

RCP L bursting from 16 to 27 MHz. No modulation lanes, but very fast scintillation, almost like S bursting but not quite.

Jupiter was -29° to -6° off axis.

Jupiter was leading the Sun by 60° .
