Adding to Tom & Wes's nice reports, here's more Io-B/D from Tuesday morning.

Io-B started off early RCP L bursting from 0654 lasting until 0837.

Io-B also had a negative drifting RCP N event from 0741 to 0801.

Io-D showed at 0742 with a long LCP N event from 0742 to 0902.

Io-B finished up with a nice RCP vertex early arc made completely of S bursting from 0837 to 1025.

No modulation lanes visible.

Jupiter was -34° to $+17^\circ$ off axis.

Jupiter was leading the Sun by 176° .
