To: RadioJove-Data <radiojove-data@lists.nasa.gov>

Adding to Tom's nice reports, here's some Io-B from Saturday morning.

Overall a very poorly organized storm compared to most Io-B events.

RCP dominant narrow band S burst trains 1510-1704 UTC from 16 to 25 MHz, zero net frequency drift.

RCP dominant S bursting (wide band) 1614-1651 UTC from 16 to 24 MHz, zero net frequency drift.

Jupiter was -17° to $+11^\circ$ off axis.

Jupiter was leading the Sun by 18° .
