Adding to Tom & Wes & Nathan & Jim's nice reports, here's some Io-B from Tuesday morning.

RCP dominant L bursting 0954-1142 UTC from 16 to 32 MHz, vertex early arcs, minor (negative slope) modulation lanes visible.

Io-B was followed by an Io-D arc (reported separately).

Jupiter was -30° to -3° off axis.

Jupiter was leading the Sun by 84° .
