

JANUARY 6, 2018 Io-C from Radio Alachua

From my log:

Io-C: 0952-1100UT RCP: L-Bursts below 21 MHz for the most part, all on SDR Play2. Many Faraday Lanes.

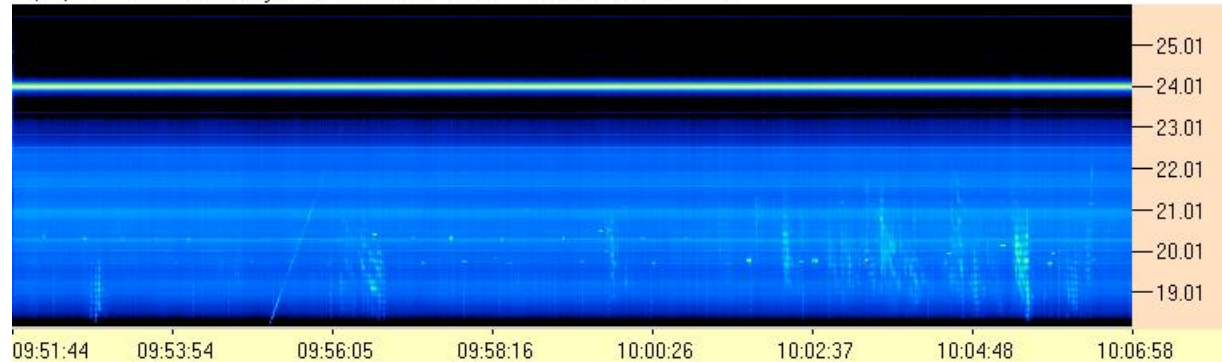

1025-1027UT Strong flurry of negative drift L-Bursts.

1040-1043UT More L-Bursts w/FL, 21 to 18 MHz.

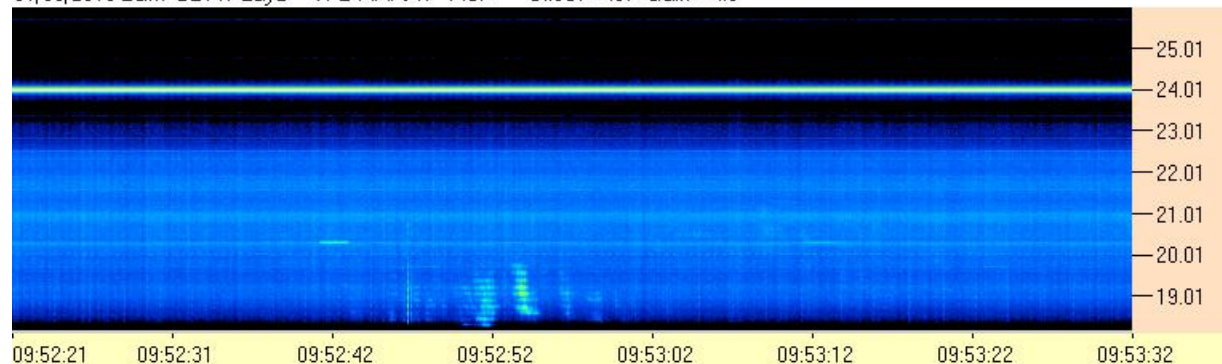

1051-1051:30UT Ditto the above, mostly below 20 MHz.

1054:30-1055UT Stronger L-Bursts with negative drift.

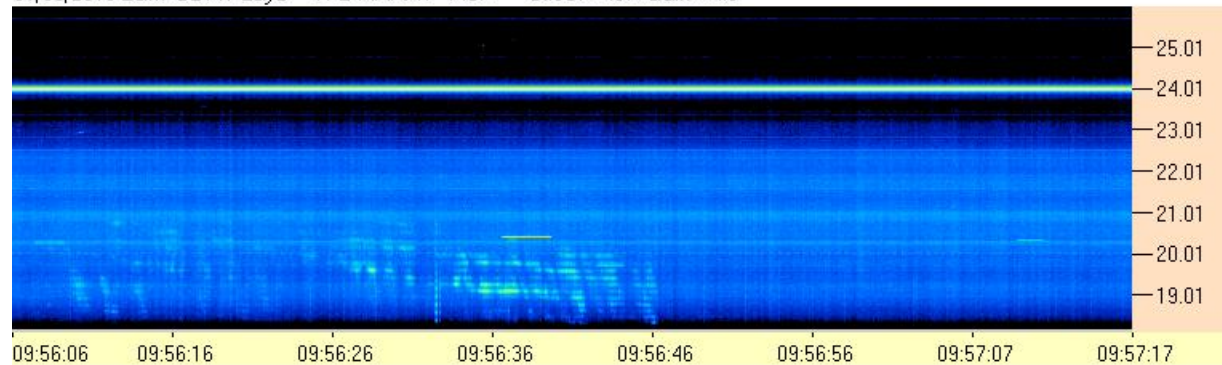

01/06/2018 LGM SDR.Play2 TFD ARRAY RCP Offset = 457 Gain = 4.9
